SUMMARY

Full-stack programmer with 2 and 1/2 years of professional software development experience and over a decade of experience writing/building web apps. Seeking a junior to mid level software engineering role near **Richmond, VA** or remote.

SKILLS

Programming Languages TypeScript, HTML5, CSS3, SQL, Java, Golang, Ruby, Nix

Frameworks TailwindCSS, React, Angular, Rails, Spring

Developer Tools Git, Bash, NeoVim, PNPM, Linux, NixOS, Docker, NGINX

EXPERIENCE

Akytech Consulting, ATIS (Army Training Information System)

Fort Eustis, VA (Remote)

SOFTWARE DEVELOPER

Jan. 2023 - Aug. 2025

- Designed, developed, and maintained 4 mission-critical Army training applications (**Central Army Registry (CAR)**, **TRADOC Application Gateway (TAG)**, **My Training Tab (MT2)**, and **Training Development Capability (TDC)**) serving over 200,000 monthly users, enhancing training accessibility and efficiency.
- Refactored and optimized codebases across 3 front-end frameworks (**TypeScript**, **Angular**, **TailwindCSS**, **Angular Material UI**) and back-end systems (**Java**, **JRuby on Rails**, **Microsoft SQL Server**), resolving 30+ critical tickets and boosting application stability.
- Debugged and enhanced **Java** and **Spring** back-end systems, improving performance and reliability for high-traffic applications.
- Automated developer workflows using **Bash** and **Batch** scripts, streamlining processes and reducing setup time.
- Authored and optimized **PL/SQL** and **T-SQL** queries and stored procedures, improving database performance and reporting capabilities.
- Enhanced user interfaces based on user feedback, implementing accessibility improvements that increased user satisfaction.
- Collaborated to co-author reference materials, ensuring clear documentation for end-users and developers.
- Adhered to strict security protocols and completed 12+ annual training programs, ensuring compliance with Department of Defense standards.
